Small Beginnings Make Great Endings

The biggest achievement in the history of mankind are culmination of efforts sustained with considerable lengths of efforts sustained with small beginnings. No human activity can have a great ending unless it is started by someone in the first place. Many people with great dreams and visions failed to reach anywhere as they are not willing to take the first small step. Notable achievements of some of the consistent effort starting from small beginnings. Rome, for sure, was not built in a day. Success stories of many leading businessmen captains of industry now, powerfully illustrate the truth of the proverb. The field of human activities, be it business world or the realm of art or science the truth lies in the maxim, "Small beginnings make great endings."

How Corona affected tourism in Manali

Corona outbreak got serious when the rate of people suffering from the virus suddenly increased. On 24th March 2020, our Hon'ble Prime Minister Mr. Narendra Modi, announced National lockdown. As 80% of income source in Manali is tourism, so it was a great loss for many people as well as for the government of Himachal.

Due to this outbreak, most people found it difficult to survive because of no source of income. Some people went back to their village, deserting Manali, as it was no longer populated with tourists, so there was no point staying in Manali. Because of the lockdown, the transport was also cut-off, but despite of that problem, people preferred to walk, no matter how far their home was.

Due to this lockdown, the most affected people were the labors, street-vendors and small business owners of Manali, who mostly relied on the daily wages. Even though, the virus was dangerous, but the poor people were actually afraid of dying from hunger. Although the lockdown caused immense loss to humanity but in other way it had gifted new life to the environment.

The lockdown caused immense loss all over the state, but it was in some way benefited too. Like, the town got much cleaner, the air we breathing were polluted and was cleaned, river got cleaner and numbers of birds flying around increased. For me, the virus was an act of Nature, to refer to itself and also to punish humans.

Comparative Analysis Between Covid-19 And The Black Death

There have been many people who said that corona virus pandemic is a modern Greek plague. Many have drawn parallels between Covid-19 and

the great plague which occurred in 1665 to 1666. Is this case real? The Black Death has some haunting similarities with covid-19 indeed the spread of Covid-19 also known as corona virus has lead many to draw similarity between this pandemic and the Great plague. The Great plague also known as 'The Black Death' which broke out between 1665 to 1666 was a bacterial infection which was found in rats. Covid-19 is a disease caused by coronavirus which is a virus that affects our respiratory system. It is a virus which likely passed on from animals to human and it is alleged that the virus emerged at Wuhan live market where someone ate an infected creature particularly a bat. On the other hand the plague was spread by fleas which fed on infected rat's blood and once they bit an infected rat the infected fleas spread the disease to humans by biting them. Incubation of plague took 4-6 days when the plague appeared in a household, the house was sealed, condemning the whole family to death. From 1666 to 1668, 30% to 50% of London's population died of the plague. The incubation of Covid-19 also take 4 to 5 days. Both spread mainly in cities. Some symptoms were also similar.

Talking about Covid-19, it is not just a health crisis but also an economic one. As global lockdown has been placed, empty streets, businesses closing, travel restrictions and people being laid off had become new normal. Nations are predicting slow fall in global economy and most economists were debating whether or not the world is going into a recession or a depression. What we learn about the past pandemics is that they follow a certain pattern. One, they spread through globalization. Two, they bring xenophobia. Three, the biggest burden always fell on the poor. So, to prove this, let's take a look at the most deadly pandemic in history 'The Bubonic plague' or 'The Black Death'. It swept across the world in 14th century killing 50 million people. 30 to 60% of the population in Europe and the obvious difference between Covid-19 and The Black Death is that Bubonic plague was caused by bacteria and one would die if he is infected what we all experienced

History's Worst Pandemics

Pandemics are large scale outbreaks of infectious diseases which can greatly increase morbidity and mortality over a geographic area and cause significant economic, social and political disruptions. Evidence suggests that the likelihood of pandemics has increased over the past century because of increased global travel and integration. These trends likely will continue and intensify. In many ancient societies, people believed that gods inflicted diseases and destruction upon those that deserved wrath. Luckily, humanity's understanding of the causes of disease has improved, and this is resulting in a drastic improvement in response to modern pandemics. No matter the challenge, there has been a light at the other end and lessons to be learned. Together humanity has shed on the precipice of many uncertainties caused by ruthless diseases.

Practice of quarantine began during the 14th century as an effort to protect coastal cities from plague epidemics. Scientists use a basic measure to track the infectiousness of a disease called the reproduction number, known as R^0 or " R naught". This number tells us how many susceptible people, on an average, each sick person will in turn affect. For example, measles kills the being most contagious with R^0 range of 12-18, means a single person can infect, on an average, 12-18 people in an unvaccinated population. The concept of pandemic is not new, it is striving from times. Many pandemics occurred in foregoing years, more civilized humans became- with larger cities, more trade routes, and increased contact with different nations of people, animals and ecosystems- the most deadly pandemics would occur. Some of the major and deadliest pandemics that have occurred over time are:

The Plague: It occurred in time period of about 165-185 A.D. It was believed to be either smallpox or measles. Symptoms included fever, sore throat, diarrhoea. The patient lived long enough, pus filled sores. Death of this disease was 5 million.

The Justinian: - It occurred during 541-542 A.D. It led about 50 million people, 26 percent of the world population. It is believed to be the first significant appearance of the bubonic plague, which features enlarged lymphatic gland and is carried by rats and spread by fleas. **The Black Death:** - It was prevalent during 1347-1351 A.D. responsible for the death of one third of the world population. This was the second large outbreak of the bubonic plague possibly started in Asia. Dead bodies became so prevalent that many remained rotting on the ground and created constant stench in cities. Death toll of this pandemic was 200 million.

The Great Plague of London: - It occurred during 1665. This bubonic plague led to the death of 20 percent of London's population. Death toll was 1,00,000.

Cholera Pandemic: - It occurred in 1817 A.D for the first time. This wave of the small intestine infection originated in Russia, where one million people died. Spreading through faeces-infected water and food, the bacterium was passed along to British soldiers who brought it to India where millions more died.

Spanish Flu: Occurred during 1918-1919. It spread due to infection from H1N1 virus and pre-human host was pig. It resulted in 50 million deaths worldwide. At the time, there were no effective drugs or vaccines to treat the killer flu strain. But the flu threat disappeared in the summer of 1919 when most of the infected had either developed immunity or died.

HIV/AIDS: - It was first identified in 1981. AIDS destroys a person's immune system, resulting in eventual death by diseases that the body would usually fight off. This disease destroys T-cells. It is believed to have developed from a chimpanzee. About 25-35 million people died due to this disease.

COVID-19: - On March 11, 2020, the World Health Organization announced that the COVID-19 virus was officially a pandemic after barreling through 114 countries in three months. Its symptoms include respiratory problems, fever and cough and can lead to pneumonia and death. Like SARS, it spreads through droplets from sneezes. The first reported case in China appeared on November 17, 2019. By December 2020, it had infected more than 75 million people and led to more than 1.6 million deaths worldwide. The number of new cases is growing faster than ever, with more than 5,00,000 reported each day on average.

ग्रुप सैकेंड चैम्पियनशिप में कुल्लू रहा अव्वल

शिमला के रोहड़ में हुई प्रतियोगिता

कुल्लू, 22 सितम्बर (अग्रणी): ग्रुप सैकेंड चैम्पियनशिप में कुल्लू महाविद्यालय के बच्चों ने बेहतरीन प्रस्तुतियों के दम पर अव्वल स्थान प्राप्त किया। कुल्लू महाविद्यालय से संगीत विभाग के एच.ओ.डी. डा. हरि सिंह ठाकुर ने बताया कि यह प्रतियोगिता रोहड़ के सीमा कालेज में हुई।

कुल्लू के विद्यार्थियों ने फोक संगीत, क्लासिकल, शास्त्रीय संगीत, फोक संगीत, ग्रुप संगीत इंडियन, फोक अकेस्ट्र, वैस्टर्न ग्रुप और वैस्टर्न सोलो में हिस्सा लिया। उन्होंने बताया कि कुल्लू ने शास्त्रीय संगीत और पारंपरिक लोकसंगीत में तीसरा

कुल्लू : पुरस्कार हासिल करने के बाद विद्यार्थी डा. हरि सिंह ठाकुर के साथ।

स्थान प्राप्त है। कुल्लू महाविद्यालय की प्राचार्य चंदना वैद्य ने विद्यार्थियों को बधाई दी है।

उन्होंने कहा कि आगामी प्रतियोगिताओं के लिए बच्चे और अधिक मेहनत करें, ऐसे प्रतियोगिताएं

बच्चों को आगे बढ़ने के लिए मंच मुहैया करवाती हैं और बच्चों को इनमें बढ़-चढ़कर भाग लेना चाहिए। डा. हरि सिंह ने कहा कि ऐसी प्रतियोगिताओं के लिए हिमाचल को जोन में विभाजित किया जाना

चाहिए। इससे दूरदराज के बच्चों को भी सहूलियत मिलेगी और आयोजन में कम खर्च के साथ-साथ आसानी भी रहेगी। रोहड़ में कालेज के विद्यार्थी निखिल और अर्जुन ने पुरस्कार प्राप्त किए।
